

**SAFETY DATA SHEET**

*In accordance with the criteria of Regulation No 1907/2006 (REACH) with further changes.*

**SECTION 1: IDENTIFICATION OF THE SUBSTANCE / MIXTURE AND OF THE COMPANY / UNDERTAKING****1.1 Product identifier:**

Super Aromas **Cappuccino Leaves**  
Product code: **SA-2022264/MBS**

**1.2 Relevant identified uses of the substance or mixture and uses advised against:**

Relevant identified uses: Concentrated flavour mix, for flavouring food, according to the quality specification.  
Uses advised against: other than above.

**1.3 Details of the supplier of the safety data sheet:**

Supplier: Sobucky Sp. z o.o. Sp.k.  
Address: Tomasza Zana 11 A, 20-601 Lublin, Poland  
Phone: (+48) 530 900 757  
E-mail address of the person responsible for the information card: [info@sobucky.com](mailto:info@sobucky.com)

**1.4 Emergency telephone number:**

112 (general emergency phone number).

**SECTION 2: HAZARDS IDENTIFICATION****2.1 Classification of the substance or mixture.**

Classification of the mixture in accordance with Regulation (EC) No. 1272/2008:  
Skin Sens. 1, H317 skin sensitization, category 1, H317.  
The mixture is not classified as hazardous to the environment.  
The mixture is not classified as hazardous because of its physical properties.

**2.2 Label elements.**

Signal word: **WARNING.**  
Pictogram:

**Contains methyl cyclopentenolone.**

**Hazard Statements H-phrases:**

H317 May cause an allergic skin reaction.

**Precautionary statements P-phrases:**

P280 Wear protective gloves / protective clothing / eye protection / face protection.

P302 + P352 IF ON SKIN: Wash with plenty of water.

P501 Dispose of contents / container to an approved waste disposal plant.

**2.3 Other hazards.**

This mixture does not meet the criteria for persistent, bioaccumulative and toxic or very persistent and very bioaccumulative in accordance with Annex XIII. This mixture and its ingredients are not included in the list established in accordance with Article 59(1) for having endocrine disrupting properties, and they are not identified as having endocrine disrupting properties in accordance with the criteria set out in Commission Delegated Regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605. Mixture does not contain SVHC substances  $\geq 0,1\%$ .

**SECTION 3: COMPOSITION/INFORMATION ON INGREDIENTS****3.1 Substances.**

Not applicable.

**3.2 Mixtures.**

Hazardous components:

Component	CAS No.	EINECS No.	w/w %	Index No./ REACH No.	Classification according to the Regulation (EC) No 1272/2008
Propylene glycol	57-55-6	200-338-0	$\leq 92,85$	none/01- 2119456809-23-XXXX	not classified
Ethyl maltol	4940-11-8	225-582-5	$\leq 4,5$	none/not applicable.	Acute Tox. 4, H302; oral: LD50=1200 mg/kg bw
Methyl cyclopentenolone	80-71-7	201-303-2	$\leq 1,92$	none/not applicable.	Acute Tox. 4, H302 oral: LD50=1067 mg/kg bw Skin Sens. 1, H317

Full text of H - phrases in section 16.

**SECTION 4: FIRST AID MEASURES**

The usual precautions for handling chemicals should be applied. In case of any symptoms of concern – call medical help. NEVER induce vomiting in an unconscious person. Remove the victim from the danger zone. Show the attached Material Safety Data Sheet to the physician. Do not leave the injured person unattended.

**4.1 Description of first aid measures.**

**INHALANTION:** Remove to fresh air. Seek medical advice if symptoms of an allergic reaction occur. Keep unconscious person in a comfortable position and seek medical advice.

**SKIN CONTACT:** Remove contaminated shoes and clothing immediately. Wash with water and soap. Seek medical advice if symptoms of an allergic reaction occur.

INGESTION:	In case of swallowing, if the amount is small (no more than one mouthful), rinse the mouth with water and consult a doctor. Provide conditions for rest. Do not induce vomiting. Seek medical advice - show the label. In case of accidental ingestion, contact a physician to assess the need for follow-up and further symptomatic treatment hospital conditions.
EYE CONTACT:	Remove contact lenses (glass) if possible. Protect the uninjured eye. Immediately wash out with plenty of water for at least 15 minutes, also under the eyelids. If irritation persists consult with an ophthalmologist.

#### 4.2 Most important symptoms and effects, both acute and delayed.

No data available.

#### 4.3 Indication of any immediate medical attention and special treatment needed.

Physician makes a decision regarding further medical treatment after thoroughly examination of the injured.

## SECTION 5: FIREFIGHTING MEASURES

#### 5.1 Extinguishing media.

The product does not have flammable properties.

**Extinguishing media:** Powder, carbon dioxide, foam, water spray. Use dispersed water to protect fire-exposed containers.

**Inadvisable:** Direct water jet.

#### 5.2 Special hazards arising from the substance or mixture.

A fire often produces thick, black smoke. Exposure to decomposition products may be hazardous to health.

Do not inhale smoke. The following combustion products may be produced:

- carbon monoxide (CO)
- carbon dioxide (CO<sub>2</sub>)

#### 5.3 Advice for firefighters.

Do not allow extinguishing agent to enter drainage ditches, sewers, basements and trenches. If it is possible without endangering life or health of rescuers - containers containing the product should be removed from the area at risk of fire.

Note: do not remove tanks exposed to fire or high temperature, cool them with water from a safe distance to avoid pressure build-up, spontaneous ignition or explosion.

Special protective equipment for firefighters: coveralls, eye and face protection equipment and breathing apparatus.

## SECTION 6: ACCIDENTAL RELEASE MEASURES

#### 6.1 Personal precautions, protective equipment and emergency procedures.

Recommendations related to accidental leakage or release of the mixture:

- Put on appropriate personal protective equipment as described in section 8. Suitable material for the protective clothing - polypropylene, polyethylene. Unsuitable material - elan wool, cotton.
- Remove all sources of ignition; disconnect from the power supply any devices near the leak; do not smoke tobacco.
- Do not inhale vapours or spray.
- Provide adequate ventilation, as specified in each particular workplace.

## 6.2 Environmental precautions.

Do not allow the product to reach the sewage system, surface waters, groundwater and soil, cellars/pits.

## 6.3 Methods and material for containment and cleaning up.

- Cover the released mixture with non-flammable material absorbing liquids (e.g. sand, earth or sorbent) and collect mechanically (with a shovel) to marked waste containers.
- In order to limit leakage, use absorbent hoses/sleeves/mats or cover the spill with a sand/sorbent shaft.
- Use special magnetic plates to protect the sewage openings.
- In the event of a significant leak, notify the Fire Brigade (p. 112), the nearest local authorities, and, if necessary, the nearest Chemical Rescue Unit.

## 6.4 References to other sections.

Always use personal protection in accordance with the guidelines given in section 8. Collect the collected liquid - together with contaminated sorbents, sand and other equipment used to clean up the spill - dispose of in accordance with the recommendations given in section 13.

# SECTION 7: HANDLING AND STORAGE

## 7.1 Precautions for safe handling.

Handle in accordance with good occupational hygiene and safety practices. Avoid contact with skin and eyes. Do not inhale vapours. Ensure adequate ventilation. Before break and after work wash carefully hands. Keep not used containers tightly closed. Do not allow the product to get into mouth and eyes.

### Fire prevention:

Use in well-ventilated rooms. Protect against access by unauthorized personnel.

### Recommended equipment and procedures:

Personal protective equipment: see section 8. Do not eat, drink or smoke in the application area. Dispose of wash water in accordance with local and national regulations. Persons who are prone to problems related to skin sensitization or asthma, allergies, chronic or recurrent respiratory diseases should not be employed in any operation involving this mixture. Use standard fire protection measures.

## 7.2 Conditions of safe storage, including any incompatibilities.

Keep containers tightly closed in cool, dry and well-ventilated area. Keep away from food, beverages or feed for animals. After opening, seal the container and store in an upright position to prevent leakage. Keep away from strong oxidizing agents, concentrated acids and bases. Prevent access by unauthorized persons. Avoid heat and ignition sources. Keep away from direct sunlight. Tightly seal unused container. Store at 5-25 °C.

## 7.3 Specific end use(s).

No information about the applications other than those listed in subsection 1.2.

# SECTION 8: EXPOSURE CONTROLS / PERSONAL PROTECTION

## 8.1 Control parameters.

Component	CAS	OSHA PEL 8-hour TWA	NIOSH REL Up to 10-hour TWA	CAL/OSHA PEL 8-hour TWA
Not applicable				

Please verify your national limits according to national regulations.

## 8.2 Exposure controls.

Pictogram regarding the obligation to use personal protective equipment (PPE):

Use the product in accordance with good occupational hygiene and safety practices. Ensure adequate ventilation. When handling do not eat, drink or smoke. Before break and after work carefully wash hands. In the vicinity of the work should be installed safety showers and separate washer eyewash. At the exit of the room in which you are working with toxic materials should be at least one sink with brought to the warm water - for every twenty employees.

Hand and body protection:

Wear the protective gloves (long-term exposure - butyl rubber, thickness: 0,3 mm, penetration time: >480 min., short-term exposure: nitrile rubber, thickness: 0,4 mm, penetration time: >30 min.) and protective clothing. The material that the gloves are made of must be impenetrable and resistant to the product's effects. The selection of material must be performed with consideration of breakthrough time, penetration speed and degradation. Moreover, the selection of proper gloves depends not only on the material, but also on other quality features and changes depending on the manufacturer. The producer should provide detailed information regarding the exact breakthrough time. This information should be followed.

Eye/face protection:

Wear tight safety glasses when there is a danger of possible eye contamination (EN166).

Respiratory protection:

In case of normal and as intended use, no respirator is needed. If exposure limits are exceeded, apply face mask with appropriate organic vapour cartridge (EN 143) filter P2.

Environmental exposure controls:

Do not allow the mixture to contaminate surface water/ground water.

## SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES

### 9.1 Information on basic physical and chemical properties.

Appearance:	liquid
Colour:	pale yellow
Odour:	characteristic
Melting point/freezing point:	no data
Boiling point or initial boiling point and boiling range	> 35 °C
Flammability:	not flammable
Lower and upper explosion limit:	17,4 %/2,4 % (for propylene glycol)
Flash point:	> 60 °C
Auto-ignition temperature:	no data
Decomposition temperature:	does not apply
pH value:	5,5-5,6
Kinematic viscosity:	no data
Solubility in water:	soluble
Partition coefficient n-octanol/water (log value):	does not apply
Vapour pressure:	20 Pa (for propylene glycol)
Density and/or relative density:	1,055 g/cm <sup>3</sup> (20 °C)
Relative vapour density:	no data
Particle characteristics:	does not apply

**9.2 Other information.**

Lack of other information.

**SECTION 10: STABILITY AND REACTIVITY****10.1 Reactivity.**

Data on the mixture not available - the product has not been analysed. Ingredient data are not available.

**10.2 Chemical stability.**

This mixture is stable under the storage and handling conditions recommended in Section 7.

**10.3 Possibility of hazardous reactions.**

No other data available.

**10.4 Conditions to avoid.**

No data available.

**10.5 Incompatible materials.**

No data available.

**10.6 Hazardous decomposition products.**

No other data available.

**SECTION 11: TOXICOLOGICAL INFORMATION****11.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008.**

Acute toxicity:	Based on the available data, the classification criteria are not met.
Skin corrosion / irritation:	Based on the available data, the classification criteria are not met.
Serious eye damage / irritation:	Based on the available data, the classification criteria are not met.
Respiratory or skin sensitization:	May cause an allergic skin reaction.
Germ cell mutagenicity:	Based on the available data, the classification criteria are not met.
Carcinogenicity:	Based on the available data, the classification criteria are not met.
Reproductive toxicity:	Based on the available data, the classification criteria are not met.
Specific target organ toxicity - single exposure:	Based on the available data, the classification criteria are not met.
STOT-repeated exposure:	Based on the available data, the classification criteria are not met.
Aspiration hazard:	Based on the available data, the classification criteria are not met.

Toxicological properties of hazardous substances in the mixture:

Methyl cyclopentenolone:

Acute toxicity - oral: LD50 (Rat): 1067 mg/kg

Ethyl Maltol:

Acute oral toxicity: LD50 (Rat): 1200 mg/kg;

**11.2. Information on other hazards.**

CIRC (International Center for Cancer Research) monograph(s):  
CAS 123-35-3 : IARC Group 2B : Possibly carcinogenic to humans.  
CAS 89-82-7 : IARC Group 2B : Possibly carcinogenic to humans.

**SECTION 12: ECOLOGICAL INFORMATION****12.1 Toxicity.**

Content of the toxic component after using the calculation method is below the limit level. The criteria for environmental toxicity are not met.

**12.2 Persistence and degradability.**

Propylene glycol:

81 % after 28 days of the OECD 301F test

96 % after 64 days of the OECD 301F test

Biodegradation may proceed slowly in anaerobic conditions.

Biodegradation in water - screening tests: Readily biodegradable (100%).

**12.3 Bioaccumulative potential.**

For mixture – no data available

Propylene Glycol:

Possibility of bioconcentration is low (BCF <100 or log Pow <3) breakdown factor, n-octanol/water (log Pow):

-1.07 @ 20.5 °C and pH 6.2 - 6.4 method EU A.8 Bioconcentration factor: 0,09.

Bioaccumulation potential: No bioaccumulation potential.

**12.4 Mobility in soil.**

Product mobile in soil and in water. Mobility of components in the mixture depends on the hydrophilic and hydrophobic properties and conditions of biotic and abiotic soil, including its structure, climatic conditions, seasons and soil organisms.

**12.5 Results of PBT and vPvB assessment.**

The substances in the mixture do not meet the criteria for classification as PBT or vPvB in accordance with Annex XIII REACH.

**12.6 Endocrine disrupting properties.**

Product not identified as having endocrine disrupting properties.

**12.7 Other adverse effects.**

This product has no influence on the global warming or the ozone layer depletion. Consider other harmful effects of the individual components of the mixture on the environment (e.g. impact on the growth of global warming).

**SECTION 13: DISPOSAL CONSIDERATIONS****13.1 Waste treatment methods.**

Proper waste management of the mixture and/or container should be determined in accordance with the provisions of Directive 2008/98/EC. Do not pour into drains and waterways. Waste management should be carried out without posing a threat to human health and without posing a threat to the environment, in particular to water, air, soil, fauna and flora. Recycle or dispose of in accordance with applicable regulations by a licensed waste treatment company. Do not pollute the soil or water with waste, do not dispose of it in the environment. Dirty packaging: Empty the container completely. Keep the label(s) on the container. Hand over to a licensed waste treatment company.

## SECTION 14: TRANSPORT INFORMATION

**14.1 UN number or ID number.**

Not applicable.

**14.2 UN proper shipping name.**

Not applicable.

**14.3 Transport hazard class(es).**

Not applicable.

**14.4 Packing group.**

Not applicable.

**14.5 Environmental hazards.**

Not applicable.

**14.6 Special precautions for user.**

Not applicable.

**14.7 Maritime transport in bulk according to IMO instruments.**

Not applicable.

## SECTION 15: REGULATORY INFORMATION

**15.1 Safety, health and environmental regulations/legislation specific for the substance and mixture.**

**Regulation (EC) No 1907/2006** of the European Parliament and of the Council of 18 December 2006 concerning the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH), establishing a European Chemicals Agency, amending Directive 1999/45/EC and repealing Council Regulation (EEC) No 793/93 and Commission Regulation (EC) No 1488/94 as well as Council Directive 76/769/EEC and Commission Directives 91/155/EEC, 93/67/EEC, 93/105/EC and 2000/21/EC.

**Regulation (EC) No 1272/2008** of the European Parliament and of the Council of 16 December 2008 on classification, labelling and packaging of substances and mixtures, amending and repealing Directives 67/548/EEC and 1999/45/EC, and amending Regulation (EC) No 1907/2006 (Text with EEA relevance).

**COMMISSION REGULATION (EU) 2020/878** of 18 June 2020 amending Annex II to Regulation (EC) No 1907/2006 of the European Parliament and of the Council concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH)

**Classification of dangerous goods** according to the European Agreement concerning the international carriage of goods by road hazardous (ADR). European directive on waste.

**15.2. Chemical safety assessment.**

Chemical safety assessment was not performed for this mixture.

## SECTION 16: OTHER INFORMATION

Version:

1.0 first version

TWA Time Weighted Average

PEL Permissible exposure limit

TLV-C Threshold limit value- Ceiling Limit

STEL Short-term exposure limit

PBT Persistent, Bioaccumulative and Toxic substance  
vPvB very Persistent, very Bioaccumulative substance  
CAS Chemical Abstract Service  
EC No. is a unique seven-digit identifier that is assigned to chemical substances for regulatory purposes within the European Union by the regulatory authorities.  
LD50 lethal dose, the point where 50% of test subjects exposed would die  
LC50 lethal concentration, the point where 50% of test subjects exposed would die  
EC50 half maximal effective concentration  
UN number is four-digit number that identify hazardous substances  
ATEmix Acute Toxicity Estimates for mixture.  
PEB permitted exposure for a biological material.

This product should be stored, handled and used in accordance with good industrial hygiene practices and in conformity with any legal regulations. The information contained herewith is based on the present state of our knowledge and is intended to describe our product from the point of view of safety requirements. It does not guarantee any specific properties. It does not assure any safe conditions of work if used out of line of normal handling or inconsistently with normal ways of application and occupational practices.

Classification according to Regulation (EC) No. 1272/2008	Classification procedure
Skin Sens. 1, H317	Calculation method

**Hazard Statement Code(s)**

H302 Harmful if swallowed.

H317 May cause an allergic skin reaction.
